Table of Contents

Preface. 11

Chapter 1 Introduction to the Internet of Things. 13

1.1 Why IoT? 13

1.2 Cloud Computing. 14

1.2.1 Advantages of the Cloud. 14

1.3 Machine to Machine (M2M) and IoT 15

1.4 IoT Building Blocks 16

1.5 Summary 16

Chapter 2 Basic concepts and possible IoT architectures 17

2.1 The IoT Concepts 17

2.2 IoT Architectures 17

2.2.1 Using Distributed Processors 17

2.2.2 Using Common Processor 18

2.2.3 Using Shared Distributed Processors 19

2.3 Summary 20

Chapter 3 Sensors and actuators 21

3.1 Sensors 21

3.1.1 Examples of Sensors 21

3.2 Actuators 36

3.2.1 Examples of Actuators 36

3.3 Summary 38

Chapter 4 IoT communication technologies 39

4.1 Low Power Communication Systems 39

4.1.1 Bluetooth 39

4.1.2 Wi-Fi 40

4.1.3 ZigBee 41

4.1.4 Basic RF 42

4.1.5 RFID 43

4.1.6 Direct Connection 44

4.2 Which Communication Technology to Use in IoT Systems ? 44

4.3 IoT Security 45
4.4 Summary 45
Chapter 5 Internet of Things development kits 47
5.1 TinkerForge Starter Kit. 47
5.2 ARM mbedIoT Starter Kit 47
5.3 Pinoccio 48
5.4 WunderBar 49
5.5 Espruino Pico 49
5.6 Raspberry Pi 50
5.7 BeagleBone Black 51
5.8 FlyportPro Starter Kit Ethernet 51
5.9 Parallella 52
5.10 Spark Electron. 52
5.11 Intel Galileo 53
5.12 Flutter 53
5.13 RasWIK 54
5.14 Onion Omega 54
5.15 Clicker 2 for PIC18FJ 55
5.16 BL600-eBoB 56
5.17 panStamp AVR 57
5.18 panStamp NRG 58
5.19 Arduino 59
5.19.1 Arduino Uno 59
5.19.2 Arduino Fio 59
5.20 IntrinsycIoT Development Kit 60
5.21 EFM32 Gecko Starter Kit. 61
5.22 Congatec Qseven IoT Development Kit. 62
5.23 Summary 62
Chapter 6 Using the Clicker 2 *for* PIC18FJ board 65
6.1 The Clicker 2 Board 65
6.2 The PIC18F87J50 Microcontroller. 68
6.2.1 Internal Structure of the PIC18F87J50 Microcontroller 68

6.2.2 The Program Memory 68
6.2.3 The Reset 71
6.2.4 The Clock Sources 72
6.2.5 Watchdog Timer 74
6.2.6 Parallel Input-Output (I/O) Ports 74
6.2.7 Timers 78
6.2.8 Analog-to-Digital Converter (ADC) Module 80
6.2.9 Interrupts 83
6.3 Programming the PIC18F87J50 Microcontroller on the Clicker 2 Board 87
6.4 Summary 90
Chapter 7 mikroC PRO for PIC programming language 91
7.1 Structure of a mikroC Pro for PIC Program 91
7.1.1 Beginning and Ending of a Main Program 91
7.1.2 Variable Names 92
7.1.3 Variable Types 92
7.1.4 Constants 93
7.1.5 Arrays 93
7.1.6 Pointers 93
7.1.7 Structures 94
7.1.8 Operators in C 94
7.1.9 Modifying The Flow of Control 94
7.1.10 Header Files 95
7.2 PIC Microcontroller Input-Output Port Programming 95
7.3 mikroC Pro For PIC Functions 96
7.3.1 Function Prototypes 98
7.4 Passing Arrays to Functions 98
7.5 mikroC Pro For PIC Library Functions 100
7.6 mikroC Pro for PIC Integrated Development Environment (IDE) 101
7.7 Using the Clicker 2 for PIC18FJ Development Board 101
7.7.1 Creating and Compiling the Source File 101
7.7.2 Programming the Clicker 2 board 104
7.7.3 Using the Simulator 106

7.7.4 Other Useful Windows of the mikroC Pro for PIC Compiler 108
7.8 Summary 110
Chapter 8 Using a Click board with the Clicker 2 *for* PIC18FJ board 111
8.1 The 7-Seg Click Board 111
8.2 Plugging in the 7-Seg Click Board 112
8.3 The Project 112
8.3.1 Writing the 7-Seg Click Display Program as a Function 116
Chapter 9 Using a sensor with the Clicker 2 for PIC18FJ board 119
9.1 Connecting the HTU21D Click Board to the Clicker 2 Board 119
9.2 The HTU21D Click Board 120
9.3 Operation of the HTU21D Sensor 120
9.4 The Software 122
9.5 Displaying the Temperature and Humidity 123
Chapter 10 Using an Actuator with the Clicker 2 for PIC18FJ board 125
10.1 Connecting the Relay Click Board to the Clicker 2 Board 125
10.2 The Relay Click Board 126
10.3 Operation of the Relay Click Board 126
10.4 The Program 127
Chapter 11 Using Bluetooth connectivity 129
11.1 About the Bluetooth Connectivity 129
11.2 Adding Bluetooth Connectivity 129
11.3 The Bluetooth Click Board and RN-41 Bluetooth Controller Module 130
11.3.1 Configuring the Bluetooth Module via the UART Port 131
11.4 Connecting the Bluetooth Module to the Clicker 2 Board 140
11.4.1 Bluetooth Module in Slave Mode 141
11.4.2 Bluetooth Module in Master Mode 144
Chapter 12 Using WIFI connectivity 149
12.1 Adding WiFi Connectivity 149
12.2 Connecting the WiFi Plus Click Board to the Clicker 2 Board 150
12.3 The WiFi Library 150
12.3.1 WiFi Library Functions 151
12.3.2 Making a Connection 153

12.4 The Project 153
12.5 Testing the Project 156
Chapter 13 INTERNET of THINGS example 157
13.1 Block Diagram 157
13.2 SENSORS Node Hardware 158
13.3 ACTUATORS Node Hardware 158
13.4 The SENSORS Node Software 159
13.5 The ACTUATORS Node Software 161
13.6 The PC Software 162
13.7 The Raspberry Pi Computer Software 162
Chapter 14 Storing the data on the CLOUD 165
14.1 The Hardware Setup 165
14.2 The Software 165
14.3 Using the Beebotte 166
14.3.1 Installing the Beebotte API 167
14.3.2 The Beebotte Environment 169
14.3.3 Beebotte Raspberry Pi Program 171
14.4 The PC Program 174
Chapter 15 Communicating using an Android mobile phone 175
15.1 Android Mobile Phone Application Development 175
15.2 Steps in Application Development Using the B4Android Software 176
15.3 Example Project 176
Appendix A Introduction to the RASPBERRY PI computer 181
Appendix B Using the Linux Command Line 191
Appendix C Programming listings 205
Index 255
