
Acoustics in Performance

All you need to know about good acoustics
and sound systems in performance and worship spaces

Richard A. Honeycutt, Ph.D.

INTRODUCTION	7
I. THE SCIENCE OF ACOUSTICS	9
1. Architectural Acoustics: Then and Now	9
2. Physical Acoustics: The Nature of Sound	10
3. Physiological Acoustics: Loudness	18
Localization	20
Discrimination of auditory events	21
Masking	21
4. The Nature of Speech, Music, and Noise	22
II. PHYSICAL ACOUSTICS OF ROOMS	25
5. Reverberation	25
6. Echoes	29
7. Strength	30
8. Other Factors	31
Intimacy	32
Envelopment	32
Warmth	33
Spaciousness	33
Clarity and Definition	33
Ensemble, Stage Support	34
Ambient Noise	34
Uniform Sound Coverage	35
Speech Intelligibility	35
9. Factors in Room Design	36
Shape	36
Volume	40
Occupancy	41
Finish Materials	42
Acoustical Insulation	45
Heating, Ventilation and Air Conditioning (HVAC)	47
Factors Affecting Congregational Hymn Singing and Liturgical Reading	47
III. ATTAINING THE GOAL	49
10. Preferred Acoustical Performance of Performance Spaces and Sanctuaries	49
General Comments	49
11. Preferred Acoustical Performance of Fellowship Halls, Gymtoria, and Life Centers	60
12. Preferred Acoustical Performance of Viewing Rooms	61
13. Preferred Acoustical Performance of Rehearsal Rooms	62

IV. CONTROLLED ACOUSTICS	65
14. Sound Systems: Intro to Sound Systems	65
Design Targets — Loudspeakers and Amplifiers	66
Design Targets — Electronics	71
Mixers — Analog	72
Equalizers and DSP's	74
Digital Mixers	74
Microphones — Wired and Wireless	76
Hearing Assistance Systems	78
Portable Sound Systems	79
Stage Monitors	80
15. Reverberation Enhancement	81
16. Variable Reverberation	83
Coupled Spaces	83
Reversible Panels	84
Draperies	84
V. WORKING WITH YOUR ROOM	85
17. Sound System Use	85
Introduction	85
System Power	85
System Layout	85
Automix System with No User Controls	87
Automix System with User Controls	88
Manual Mix Systems	89
Digital Mixers	89
Audio Recording Using CD and DVD Recorders	96
Effects (Artificial reverb, echo, etc.)	98
18. Using Portable Sound Systems	100
19. The Musician/Vocalist Environment	103
Using Monitor Loudspeakers	103
Rehearsal in Empty Rooms	104
20. Correcting Poor Acoustics in Existing Rooms and Maintaining Good Acoustics Through a Renovation	104
General Renovation Issues	104
Correcting Poor Acoustics	105
APPENDIX A: OBTAINING GOOD ADVICE ON ACOUSTICS	106
APPENDIX B: COMPUTERIZED ACOUSTICAL ANALYSIS	109
APPENDIX C: REFERENCES	113
INDEX	116
