Guest Editorial

Towards advanced audio power amplifiers - David Zan	7
-----------------------------------------------------	---

Tutorials

TPC and TMC Feedback Compensation for Power Amplifiers– Bob Cordell	17
Fine-tuning and measurements of a sensorless motional feedback subwoofer– Robert Munnig Schmidt	33
RIAA Revisited, or how to better judge documented figures– Hans Polak	47
Introduction to Noise – Ronald Quan	67

Circuit design

Multiplied Transconductance Amplifiers Part I – Frank Blöhbaum	83
Proteus – a current input moving coil preamp– Erno Borbely, Sigurd Ruschkowski*	109
Practical Electronic Control of Class AB Output Stage Quiescent Current– Daniel Joffe	139
The High-Octane phono preamp – Hannes Allmaier	157

Simulation and modelling

A Concise Model for Static Induction Transistor IV Characteristics – Michael Rothacher	165
----------------------------------------------------------------------------------------	-----

Speaker Design

How to design a winning, blind-preferred loudspeaker– David Moran	181
-------------------------------------------------------------------	-----

The Way I see it...

The map is not the world – Stan Curtis	197
----------------------------------------	-----

Book review

Audio Power Amplifier Design, 6th ed, Douglas Self – Jean-Pierre Vanderreydt	201
------------------------------------------------------------------------------	-----

Letters to the Editor: I encourage readers' comments on articles in Linear Audio, and I regularly receive them. They are posted on-line at www.linearaudio.net, together with the author's reply.
